

What do High Performers do to Achieve Operational Excellence?

Inefficient Business Intelligence development and deployment processes, siloed implementations, high operational cost, poor audit compliance and the limitations of disconnected teams hinder the performance of even the best-intentioned IT organization.

NOAD EQM4 deals with these challenges by standardizing development and deployment processes and operations, providing difference, build and impact analysis, streamlining the entire lifecycle by enforcing workflows and automating the deployment of SAP BusinessObjects applications –even in geographically distributed environments.

These methods optimize operational performance, improve business value and return on investment by providing: increased, reliable and predictable throughput, improved quality, shortened time to market, lowered costs and improved customer experience.

Leading Fortune 500 companies use NOAD's EQM4 Change Manager and Deployment Manager solutions for more than a decade and improved the productivity of their business intelligence teams. Only NOAD EQM4, with its seamless integration into SAP BusinessObjects and QlikView, allows them to comply with regulations such as Sarbanes-Oxley, HIPAA, Basel and GxP among others.

Founded in 2000, NOAD is leading provider of Enterprise Change Management solutions for the SAP BusinessObjects and QlikTech's QlikView business intelligence platform. In the past decade, NOAD has built a blue chip worldwide customer base with more than 300 customers in over 20 countries and across all industry sectors.
